

Leandra Magan-Tier

Full Stack Software Developer

As a career changer, I offer experience in communication and organisational skills, teamwork, and adaptability. I take challenges with great motivation and focus on delivering high performance. As a software developer my focal point is to write clean and efficient code to build highly functional applications. I commit to growing in this field, consistently learning and staying updated on the latest trends and technologies.

Back-end Developer

Decided to enhance programming skills focusing on the backend and with the Python programming language. Actively creating projects to deepen knowledge and technical skills with backend technologies such as Cloud computing, Docker, building API's with Python. Entering as well the world of Artificial Intelligence by completing AI application with Python and Flask.

December 2022 - Career Change

CareerFoundry Bootcamp | Berlin, Germany

Full Stack Web Developer and Python course

- Introduction to Frontend Development focused on general web development practices, code quality, testing, and web hosting. In addition, focused on concepts and fundamentals for Version Control with Git. The Full Stack Immersion section focused on building functional responsive websites/applications from scratch focusing on the programming language JavaScript and its frameworks and libraries. Concentrating on creating own web servers and API's.
- Learned Python's fundamental concepts as well as OOP concepts. Created a MySQL database and interacted with it utilising ORM. Finished the course by developing the frontend of a Recipe app with the Django framework.

2021 - 2023

Concentrix Global Services GmbH | Berlin, Germany

Customer Advisor

- Assisted clients with their social media accounts by providing best practices on how to manage and grow their businesses with Meta's tools and features.
- Trained entry-level agents and organised workshops to enhance communication and active listening skills, as well as study groups to perfection formal writing skills.
- Provided 1-1 coachings and sessions in order to improve the Team's weekly KPI. Contributed to the Backlog Management Team to comply with the Team's SLA.
